## FOLDING DOOR SYSTEM

FA55 is a folding door system. Special design works smoothly with rail bearings and hinges. It can be bunched inside and outside through the profiles that are specially designed for the system.

Openable leaves can be applied up to 110cm wide and 310cm high. The bearings used in the system have a carrying capacity of 100KG per leaf.

According to the project details, the first opening leaf can be mounted on the left and right sides. The FA55 system offers design options that meet all requirements for commercial and private projects.
