CWA 50 EP

CURTAIN WALL SYSTEM

It provides high performance sealing and heat insulation by providing condensate with single piece special cords used in the system with the same vertical and horizontal profiles. Cover and semi-cover applications can be easily made with CWA 50 EP system with glazing bead and (4s-4su) silicone grouting. Architectural demand difficulties are eliminated with insulated and normal opening leaf features. Different exterior coating forms provide different surface looks.

CWA 50 EP façade system provides high performance in open spaces with compatibility with Amanos architectural systems. .
