SSA 120

GLASS SLIDING SYSTEM

SSA 120 glass sliding system is designed to produce architectural solutions and transparent transition areas suitable for hotels, restaurants, cafes and bakeries. It opens and closes sequentially in the form of the leaves bundling each other. The SSA 120 glass sliding system is an ideal solution for projects that require a wide span with minimum aluminum.

The system is applied with 3 or 5 leaves by default. Leaves can be bundled to the right or left as desired.
