SAT 120 LS

THERMAL INSULATED SLIDING SYSTEM

SAT 120 LS is a high-performance sliding system with its design in terms of maximum visibility and comfort thermal insulation and sealing values. The leaf can be applied at a weight of 400 kg and a height of 3.50 cm. Multi-point locking is possible with the lift and slide accessory.

Automatic lift and slide accessory can be applied to the system. It combines comfort and performance with an elegant fly screen design. The monorail, 2-rail and 3-rail case options offer alternative application options. It provides alternative application options with fixed case profiles.
