# SLA 76

## SLIDING SYSTEM

SLA 76 offers the possibility of making a fixed movable leaf with the option of monorail frame. With different frame options, it is possible to apply up to 6 leaves. It has a panoramic design with minimal leaf option. It is ideal for warm climate zone and indoor spaces. It has a maximum bearing capacity of 150 kg with adjustable bearing and steel rail. Easy production is done with special corner connections. Maximum leaf height is 2.50 m.

It offers a wide field of view thanks to its minimal profile structure. Profile design is suitable for multi-point locking. It provides extra comfort with its elegant fly screen design.
