VRA 160

VERANDA SYSTEM

VRA 160 veranda system offers many options for an attractive design. The system is the most advanced product that provides solutions for outdoor protection and comfort.

It is suitable for parking lot, terrace roof and shading applications. Polycarbonate and glass application can be made in VRA 160 system. It can be converted to shading or winter garden with compatible Amanos systems in line with changing demands and needs.

The system can carry itself without the need for any steel construction up to 3500 mm depending on the static calculations. The distance between the pillars offers 4 meters of openness.
