## MOTORLU DÜŞEY SÜRME SİSTEMİ

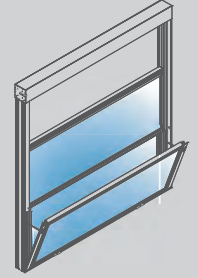

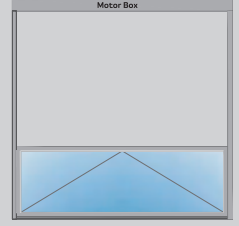

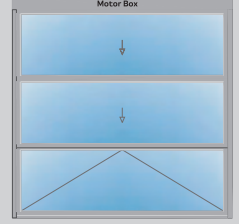

GSA 130 motorlu dikey sürme sisteminde kullanılan kanadın içe açılabilmesi, sisteme yenilik getiriyor. Mevcut sistemlerdeki en büyük sorun, yüksek katlı binalarda kullanıldığında pencerelerin dış kısmının temizlenememesiydi. GSA 130 sistem ile, içe açılan bir kanat ile kolayca temizlenebilir. GSA 130 sistemi 2 kanat, 3 kanat, 4 kanat olarak üretilebilir.

Sistemde kullanılan elektronik motor yardımı ile paneller istediğiniz yere durdurulabilir. Kanalları hareket ettiren mekanik sistem isteğe bağlı zincir ve çelik telli düz kayış ile üretilebilir. Sistem, 5000mm genişlikte 4000mm yüksekliğe kadar uygulama imkanı vardır. Sistem çift motor kullanılarak 250 KG ağırlığı taşıyacak şekilde tasarlanmıştır. Bağımsız parçalardan oluşan motor kutusu sayesinde motor bakımı her an zahmetsizce yapılabilir. GSA130 bir paket üründür. İstenirse fabrikasyon olarak farklı boyutlarda temin edilebilir.
