# SSA 140

## GLASS SLIDING SYSTEM

SSA 140 is a double-glazed sliding glass system. It is designed to create architectural solutions and transparent transition areas suitable for indoor and outdoor use. It is convenient to make and use.

You can apply original and innovative designs. This makes the glass look more elegant, aesthetic and intense with thin, narrow profiles. The system wings (right or left) can be collected at the desired location.

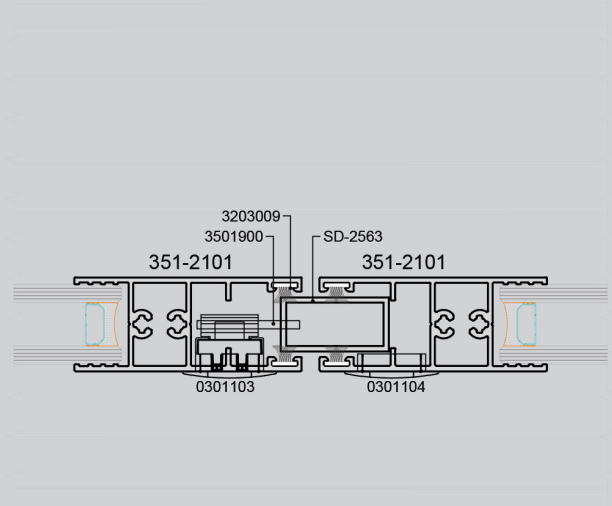

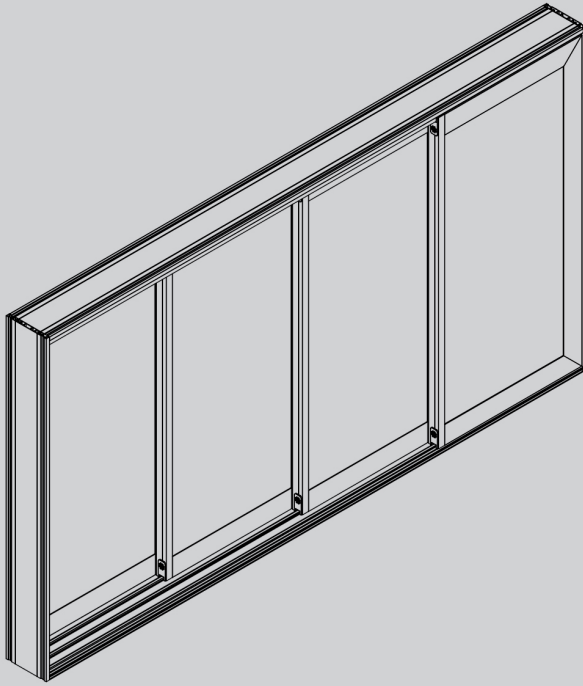

Thanks to its sliding wings, the integrity between indoor and outdoor spaces is guaranteed.
