ACCURACY HARMONY BALANCE

CWA 50 TM

CURTAIN WALL SYSTEM

The perfect combination of comfort and appeal. The thermal insulated wood application meets important technical requirements that improve the living and working environment of the building by offering aesthetic solutions with CWA50 TM lidded, half-lidded (2s), silicone (4S), application alternatives.

It is a facade system specially designed for wooden bearing systems. In addition to its decorative features, the system adds additional value for thermal insulation to buildings.

CWA50 TM represents its charm with the perfect combination of wood applications. It provides freedom in architecture with its compatibility with Amanos systems.
